06-97-38-12-11

Contents

1	Programming Fundamentals	4
1.1	Introduction to Programming Principles	4
1.2	Python Programming (Beginner to Production)	4
1.3	C++ for Systems & Performance	4
1.4	Java Development (OOP & Web)	4
1.5	Go for Concurrent & Cloud-Native Apps	4
1.6	Rust for Modern, Safe Systems Programming	4
1.7	Functional Programming (Haskell, Scala)	4
1.8	Data Structures & Algorithms	4
1.9	Clean Code, Refactoring & Design Patterns	4
1.10	Version Control with Git & GitHub	4
1.11	Shell Scripting & Command Line Mastery	4
1.12	Advanced Debugging (GDB, Valgrind)	4
2	Software Engineering	5
2.1	Agile and Scrum Methodologies	5
2.2	Requirements Engineering & System Design (UML)	5
2.3	Software Architecture Patterns (MVC, Microservices)	5
2.4	Test-Driven Development (TDD) & Quality Assurance	5
2.5	Secure Software Development Lifecycle (SSDLC)	5
2.6	Code Quality & Static Analysis (SonarQube)	5
2.7	Technical Documentation (Sphinx, MkDocs)	5
2.8	Software Release, Versioning & Deployment	5
2.9	AI & Technical Product Management	5
2.10	Site Reliability Engineering (SRE)	5
3	Web Development (Full Stack)	6
3.1	Frontend Essentials (HTML, CSS, JavaScript)	6
3.2	Modern Frontend Frameworks (React, Vue, Tailwind)	6
3.3	Backend Development (Node.js, Python with Django/Flask)	6

3.4		API Design & Development (REST, GraphQL)	6
3.5		Web Authentication & Security (JWT, OAuth2, OWASP)	6
3.6		Real-time Applications with WebSockets	6
3.7		Web Performance Optimization & SEO	6
3.8		Full Stack Application Development	6
3.9		Blockchain & Decentralized Applications (dApps)	6
4		Artificial Intelligence	7
4.1		Data Analysis & Visualization (Pandas, Seaborn, Plotly)	7
4.2		Machine Learning Engineering (Scikit-learn, MLOps)	7
4.3		Deep Learning (TensorFlow, PyTorch)	7
4.4		Natural Language Processing (spaCy, Hugging Face)	7
4.5		Computer Vision (OpenCV)	7
4.6		Deep Reinforcement Learning	7
4.7		Time Series Forecasting & Predictive Analytics	7
4.8		AI for Autonomous Systems (Self-Driving Cars)	7
4.9		Business Analytics & AI for Trading	7
5		Databases	8
5.1		Relational Databases & SQL (PostgreSQL, MySQL)	8
5.2		NoSQL Databases (MongoDB, Redis)	8
5.3		Graph Databases for Connected Data (Neo4j)	8
5.4		Data Warehousing, Data Lakes & Modeling	8
5.5		Big Data Processing with Apache Spark	8
5.6		Real-Time Data Streaming with Kafka	8
5.7		ETL & Data Orchestration with Apache Airflow	8
5.8		Business Intelligence & Dashboards (Tableau, Power BI)	8
5.9		Data Governance, Security & Compliance (GDPR)	8
5.10		Cloud Data Solutions (S3, BigQuery, Redshift)	8
6		Cybersecurity	9
6.1		Cybersecurity Fundamentals & Network Security	9
6.2		Ethical Hacking & Penetration Testing (Kali, Burp Suite)	9
6.3		Application Security (OWASP Top 10)	9
6.4		Applied Cryptography & Secure Protocols	9
6.5		Security Operations & Threat Analysis (IDS/IPS)	9
6.6		Incident Response & Digital Forensics	9
6.7		Cyber Law & Compliance Frameworks	9
6.8		Cloud & Infrastructure Security (DevSecOps)	9
7		Mobile Application Development	10
7.1		Mobile Development Fundamentals (Native vs. Cross-Platform)	10
7.2		iOS Development with Swift & SwiftUI	10
7.3		Android Development with Kotlin & Jetpack Compose	10
7.4		Cross-Platform with React Native	10
7.5		Cross-Platform with Flutter & Dart	10
7.6		Mobile UI/UX Design & Human Interface Guidelines	10
7.7		Mobile Backend as a Service (Firebase, AWS Amplify)	10
7.8		Push Notifications & User Engagement	10
7.9		Mobile Application Security	10
7.10		App Store Deployment, CI/CD & Monetization	10

8	Advanced Software Architecture	11
8.1	 Domain-Driven Design (DDD) Principles & Practices	11
8.2	 Event-Driven Architecture (EDA) & Message Queues	11
8.3	 CQRS and Event Sourcing Patterns	11
8.4	 System Design for Scalability, Resilience & High Availability	11
8.5	 Distributed Systems Concepts (CAP Theorem, Consensus, Sagas)	11
8.6	 Service Mesh & API Gateways (Istio, Kong, Envoy)	11
8.7	 Architecture Decision Records (ADRs) & Trade-off Analysis	11
8.8	 Evolving Architectures & Managing Technical Debt	11
8.9	 Software Architecture for High-Performing Teams (Conway's Law)	11
8.10	 Cloud-Native Design Patterns (12-Factor App, etc.)	11
9	Professional Development	12
9.1	 Effective Technical Communication & Presentation	12
9.2	 Navigating the Technical Interview Process	12
9.3	 Building a Professional Portfolio & Personal Brand	12
9.4	 Contributing to Open Source Projects	12
9.5	 Leadership, Mentorship & Team Collaboration	12
9.6	 The Art of Continuous Learning & Staying Current	12
9.7	 Working Effectively in Remote & Hybrid Teams	12
9.8	 Career Pathing: Specialist vs. Generalist vs. Manager	12
9.9	 Advanced Technical Writing & Diagramming	12
9.10	 Productivity & Time Management for Engineers	12

1 Programming Fundamentals

- 1.1  Introduction to Programming Principles
- 1.2  Python Programming (Beginner to Production)
- 1.3  C++ for Systems & Performance
- 1.4  Java Development (OOP & Web)
- 1.5  Go for Concurrent & Cloud-Native Apps
- 1.6  Rust for Modern, Safe Systems Programming
- 1.7  Functional Programming (Haskell, Scala)
- 1.8  Data Structures & Algorithms
- 1.9  Clean Code, Refactoring & Design Patterns
- 1.10  Version Control with Git & GitHub
- 1.11  Shell Scripting & Command Line Mastery
- 1.12  Advanced Debugging (GDB, Valgrind)

2 Software Engineering

- 2.1  Agile and Scrum Methodologies
- 2.2  Requirements Engineering & System Design (UML)
- 2.3  Software Architecture Patterns (MVC, Microservices)
- 2.4  Test-Driven Development (TDD) & Quality Assurance
- 2.5  Secure Software Development Lifecycle (SSDLC)
- 2.6  Code Quality & Static Analysis (SonarQube)
- 2.7  Technical Documentation (Sphinx, MkDocs)
- 2.8  Software Release, Versioning & Deployment
- 2.9  AI & Technical Product Management
- 2.10  Site Reliability Engineering (SRE)

3 Web Development (Full Stack)

- 3.1  Frontend Essentials (HTML, CSS, JavaScript)
- 3.2  Modern Frontend Frameworks (React, Vue, Tailwind)
- 3.3  Backend Development (Node.js, Python with Django/Flask)
- 3.4  API Design & Development (REST, GraphQL)
- 3.5  Web Authentication & Security (JWT, OAuth2, OWASP)
- 3.6  Real-time Applications with WebSockets
- 3.7  Web Performance Optimization & SEO
- 3.8  Full Stack Application Development
- 3.9  Blockchain & Decentralized Applications (dApps)

4

Artificial Intelligence

- 4.1  Data Analysis & Visualization (Pandas, Seaborn, Plotly)
- 4.2  Machine Learning Engineering (Scikit-learn, MLOps)
- 4.3  Deep Learning (TensorFlow, PyTorch)
- 4.4  Natural Language Processing (spaCy, Hugging Face)
- 4.5  Computer Vision (OpenCV)
- 4.6  Deep Reinforcement Learning
- 4.7  Time Series Forecasting & Predictive Analytics
- 4.8  AI for Autonomous Systems (Self-Driving Cars)
- 4.9  Business Analytics & AI for Trading

5 Databases

- 5.1  Relational Databases & SQL (PostgreSQL, MySQL)
- 5.2  NoSQL Databases (MongoDB, Redis)
- 5.3  Graph Databases for Connected Data (Neo4j)
- 5.4  Data Warehousing, Data Lakes & Modeling
- 5.5  Big Data Processing with Apache Spark
- 5.6  Real-Time Data Streaming with Kafka
- 5.7  ETL & Data Orchestration with Apache Airflow
- 5.8  Business Intelligence & Dashboards (Tableau, Power BI)
- 5.9  Data Governance, Security & Compliance (GDPR)
- 5.10  Cloud Data Solutions (S3, BigQuery, Redshift)

6 Cybersecurity

- 6.1  Cybersecurity Fundamentals & Network Security
- 6.2  Ethical Hacking & Penetration Testing (Kali, Burp Suite)
- 6.3  Application Security (OWASP Top 10)
- 6.4  Applied Cryptography & Secure Protocols
- 6.5  Security Operations & Threat Analysis (IDS/IPS)
- 6.6  Incident Response & Digital Forensics
- 6.7  Cyber Law & Compliance Frameworks
- 6.8  Cloud & Infrastructure Security (DevSecOps)

7 Mobile Application Development

- 7.1  Mobile Development Fundamentals (Native vs. Cross-Platform)
- 7.2  iOS Development with Swift & SwiftUI
- 7.3  Android Development with Kotlin & Jetpack Compose
- 7.4  Cross-Platform with React Native
- 7.5  Cross-Platform with Flutter & Dart
- 7.6  Mobile UI/UX Design & Human Interface Guidelines
- 7.7  Mobile Backend as a Service (Firebase, AWS Amplify)
- 7.8  Push Notifications & User Engagement
- 7.9  Mobile Application Security
- 7.10  App Store Deployment, CI/CD & Monetization

8

Advanced Software Architecture

- 8.1  Domain-Driven Design (DDD) Principles & Practices
- 8.2  Event-Driven Architecture (EDA) & Message Queues
- 8.3  CQRS and Event Sourcing Patterns
- 8.4  System Design for Scalability, Resilience & High Availability
- 8.5  Distributed Systems Concepts (CAP Theorem, Consensus, Sagas)
- 8.6  Service Mesh & API Gateways (Istio, Kong, Envoy)
- 8.7  Architecture Decision Records (ADRs) & Trade-off Analysis
- 8.8  Evolving Architectures & Managing Technical Debt
- 8.9  Software Architecture for High-Performing Teams (Conway's Law)
- 8.10  Cloud-Native Design Patterns (12-Factor App, etc.)

9

Professional Development

- 9.1  Effective Technical Communication & Presentation
- 9.2  Navigating the Technical Interview Process
- 9.3  Building a Professional Portfolio & Personal Brand
- 9.4  Contributing to Open Source Projects
- 9.5  Leadership, Mentorship & Team Collaboration
- 9.6  The Art of Continuous Learning & Staying Current
- 9.7  Working Effectively in Remote & Hybrid Teams
- 9.8  Career Pathing: Specialist vs. Generalist vs. Manager
- 9.9  Advanced Technical Writing & Diagramming
- 9.10  Productivity & Time Management for Engineers
